

Vacuum leak drainage bag

- Attaches itself quickly to surface
- No attachment belts required
- Drainage space with 20 cm (8 inch) diameter
- For large containers and storage tanks

Autonomous and ultra-speedy drainage of hazardous substances.

Let the power of the vacuum work for you. Vetter vacuum leak drainage bags seal leaks on clean, smooth and slightly curved surfaces in seconds. Without the need for tension belts! Avoiding time-consuming preparatory measures, they allow you to take immediate action in an emergency. The intelligent bag attaches itself to the liquid or gas leak area by creating negative pressure and utterly seals the leak. The round Vetter vacuum leak drainage bags are designed for optimum flow and they drain dangerous liquids safely and quickly.

Technical Data

Working pressure of vacuum generator: 6 bar (87 psi)

Product	Art.-Nr.	0	1	2	3	4
