

Compact gully sealing bags

Art.-Nr. 1460000101

Reliably seal sewage systems and gullies. With the Vetter compact gully sealing bag, you can take action immediately. Seal the gully together with the sewer inlet: ready to use on the spot, quick to put into position and easy to handle. The sealing bags withstand counterpressure of up to 2 m water column (2.9 psi) and can be inflated with the supplied compressed air cylinder. Seal gullies with a diameter of up to 80 cm (32 inch) the easy way.
