

Compact gully sealing bags

Art.-Nr. 1460000101

Reliably seal sewage systems and gullies. With the Vetter compact gully sealing bag, you can take action immediately. Seal the gully together with the sewer inlet: ready to use on the spot, quick to put into position and easy to handle. The sealing bags withstand counterpressure of up to 2 m water column (2.9 psi) and can be inflated with the supplied compressed air cylinder. Seal gullies with a diameter of up to 80 cm (32 inch) the easy way.

Technical Data

Length [mm]:	46
Weight [kg]:	3.7
Diameter [inch]:	11,61
burst pressure [psi]:	7,25
Test pressure [psi]:	9,43
Gully outlet min. - max. [inch]:	11,81 - 19,69
Test counterpressure [psi]:	29
Air requirement at working pressure [l]:	128
Cylinder length [inch]:	16,14
