

Ultra flat bags 116 psi

- Flexible in use
- Insertion height only 1.6 cm (0.6 inch)
- Ready to use in seconds
- An indispensable tool

The unbeatably flat first-aider.

With their super-flat insertion height of only 1.6 cm (0.6 inch), Vetter ultra flat bags are the ideal first-aider at the rescue site, fitting into the smallest of gaps. They exert their strength in the most confined spaces and make room for other rescue tools. Thanks to their low air requirement and extreme ease of use, Vetter ultra flat bags are ready to use in seconds. In short: an indispensable tool in a wide range of situations.

Technical Data

Unrivalled low insertion height of only 1.6 cm* (0.6 inch).

- Working pressure: 8 bar (116 psi)
- Test pressure: 12 bar (174 psi)
- Burst pressure, at least: 32 bar (464 psi)

*around valve + 6 mm (0.2 inch)
