

High-pressure leak sealing system

- Innovation from Vetter
- Sealing in difficult-to-access places
- For leaks in pipes with diameter up to 20 cm (8 inch)

Intelligent hose system for complicated pipe leaks.

In close collaboration with Henkel KGaA, Dusseldorf, Vetter has developed an intelligent sealing hose system. Now you can effortlessly access even hard-to-reach leaks in narrow or unevenly shaped piping systems.

The flexible hoses fit perfectly even over complicated leaks, e.g. at T-pieces, pipe bends, connecting branches and welded seams. The hoses are inflated in seconds.

Technical Data

Product	Art.-Nr.	0	1	2	3
1.5 m Sealing hose	1500003301	0.4	-22 - +176	2.4	203
2.5 m Sealing hose	1500016001	0.7	-22 - +176	3.1	203
3.5 m Sealing hose	1500016101	1	-22 - +176	7.9	203

Column definitions:

- 0: Air requirement, at working pressure [cu. ft.]
- 1: Temperature [°F]
- 2: Weight, approx. [lbs]
- 3: Working pressure [psi]
