

## High-pressure leak sealing system

- Innovation from Vetter
- Sealing in difficult-to-access places
- For leaks in pipes with diameter up to 20 cm (8 inch)

## Intelligent hose system for complicated pipe leaks.

In close collaboration with Henkel KGaA, Dusseldorf, Vetter has developed an intelligent sealing hose system. Now you can effortlessly access even hard-to-reach leaks in narrow or unevenly shaped piping systems.

The flexible hoses fit perfectly even over complicated leaks, e.g. at T-pieces, pipe bends, connecting branches and welded seams. The hoses are inflated in seconds.

This document was created on 20/04/2024.

## **Technical Data**

Product	ArtNr.	0	1	2	3
1.5 m Sealing hose	1500003301	0.4	-22 - +176	2.4	203
2.5 m Sealing hose	1500016001	0.7	-22 - +176	3.1	203
3.5 m Sealing hose	1500016101	1	-22 - +176	7.9	203

## Column definitions:

0: Air requirement, at working pressure [cu. ft.]

<sup>1:</sup> Temperature [°F]

<sup>2:</sup> Weight, approx. [lbs]

<sup>3:</sup> Working pressure [psi]
