

Decon shower

Planned decontamination.

Planned decontamination.

The pneumatic showers are set up in just 40 seconds and are instantly operational. They are used as emergency decontamination positions or applied in combination with tents.

The showers are constructed so that, due to their size, they can be easily and quickly integrated into the tents. Consequently the functional radius is extended by a clothe changing area. In addition to this, the decon shower has an additional frontal outside basin. This capability enables subsequent cleaning of boots and avoids any splashing of contaminated water on the floor.

Technical Data

Product	Art.-Nr.	0	1	2	3	4	5	6	7	8
