

Pressure Guard

- visual & audible warning in case of pressure loss
- constantly monitoring the pressure
- battery charge display
- rechargeable via USB

The PRESSURE GUARD makes our Safety Cushion even safer! This innovative product is an accessory for the Vetter SP16 and SP25 Safety Cushions. The PRESSURE GUARD continuously monitors the air pressure of the safety cushion to provide an additional layer of safety. Should the pressure dip below the operational level, the PRESSURE GUARD promptly issues a visual and audio alert, signalling the need for a refill. Built to withstand diverse weather conditions, its robust casing ensures usability come rain or shine. With an IP65 protection class, it can endure rain and other challenging elements.

Technical Data

Battery lasts several months unused depending on ambient temperature.
